

Baffle Filter Installation and Care Instructions

DO NOT THROW AWAY

Pieces Enclosed:

- #1) 2 Baffle Filters
 - #2) 1 Grease Trays (**Grease Tray will be installed in hood body**)
 - #3) 1 Center Panel
- (As shown Below)

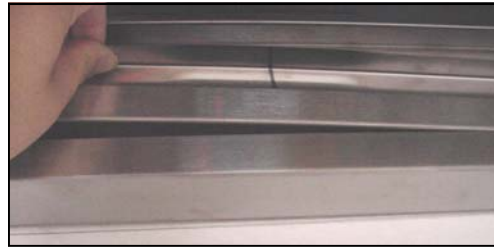

*If you have a 54" or 60" wide unit, you will receive the following:

- #1) 4 Baffle Filters
- #2) 2 Grease Trays (**Grease Tray will be installed in hood body**)
- #3) 1 Center Panel

**BAFFLES MUST SIT AT AN ANGLE
WHEN INSTALLED
(They do NOT lay flat inside the range hood)**

INSTALLATION:

Drop Grease tray in the back of the unit, against the wall, in empty slot.

Take one Baffle (slits going vertical) and insert the side without grease holes into the slot **3" above the light bar** in the front of the unit. Then slide back of baffle filter into grease tray. Slide baffle to one side and repeat on next baffle and slide to opposite side of unit.

FILTERS WILL SIT AT AN ANGLE.

Slide Center Panel between slot in the top/front and push back into grease tray. Handle should be to the front of the unit.

CLEANING AND CARE:

To Remove Baffle Filters:

- #1 Remove center panel by pulling on handled toward the front of the hood, lift up and slide out.
- #2 Move one filter to the center of the hood, pull baffle towards the front of the hood and lift out. Repeat on the next baffle filters.
- #3 Remove grease tray by lifting it out of slot in back of hood. (Grease will accumulate in tray.)

*Clean Fan, Filter and
Grease Laden Surfaces
FREQUENTLY*

Baffle Filters are dishwasher safe.
