

## EXTENDED REACH BENCH TOP SHRINKER/STRETCHER SH-01 SERIES

Our shrinking and stretching fabricator carries out the shrinking operation on the work piece when inserted between the contacting jaw surfaces. Endless variations of shapes can be obtained. The ability to shrink metal is crucial in the metal fabrication process. Works all metals effectively, both angles in the 2" wide range or flat sheets. The extra large frame opening allows parts of complex form to be worked. Each unit comes complete with one set of shrinking jaws (SH01-30) and optional stretching jaws can be refitted to the unit in a few seconds. Can be bench mounted or individual stand mounted.

- Lighter design for low cost shipping and handling
- Ductile iron cast body, machined and high quality two-part paint finish
- Forming jaws medium carbon steel, heat-treated. Reversible jaw faces for long life.

Model No.	Capacity	Inside Opening Reach	Inside Opening Ht.	Max. Metal Insertion Gap	Weight
SH-01	14 ga. alum/ 16 ga. mild steel	8-1/2"	6"	5/8"	44 lbs.
