

**MCRF-48 Series
with DuraBoard**

MOBILE TOOL CARTS MCRF SERIES

A versatile all-aluminum portable tool cart that provides tool storage, parts organization, special situation use for tradesman, maintenance persons, carpenters, heating & cooling installer, painters, metal shapers, fabricators, welders, auto or motorcycle builders, A & P mechanics and hobbyists. Dagger Tools mobile cart provides a full 4' X 8' hook board storage surface that allow full access to both cart sides and a internal storage pan that provides additional storage for tool boxes, special service equipment, raw materials a small air compressor the options are endless. You can use our bin storage clips designed for any hook board along with any Akro style plastic bin and when you're disassembling, you can conveniently deposit all nut, bolts and hardware and safely store away till you need them again. If you're in assembly you can now store both the correct installation tool right along side the parts need to complete the job. Our aluminum chassis allow you to easily transport our tool cart from the shop floor or garage to the job site. With our selection of different grades of hook boards and paired with double point locking Durahooks you can achieve up to 65 lbs of holding capacity per hook. Of course if you want to use the traditional, but antique pegboard hooks our hook boards will accept them just fine.

Equipped with full complement ball bearing casters for smooth operation and enhanced maneuvering of its 28" wide chassis. Even through limited access spaces and tight corners fully loaded is a real asset. Some assembly is required but Dagger Tool carts only require one size truss head screw and utilize permanently installed thread inserts so assembly time is truly accomplished in minutes. And you can as quickly disassemble for transportation in a small vehicle if necessary. If you damage one of the hook boards or want to substitute one style for another you can order replacement boards and within minutes repair or update your cart. A six-inch pull handle is also provided to steer and pull cart freely within any shop, plant or garage. Optional screw on tool shelves is available in several sizes for those odd size or shaped tools, liquid containers or items that just won't hang well.

**MCRF-48A
with Hardboard**

Understanding our hook board types...

HardBoard: Tempered composite wood by-product, 1/4" thick, 1/4" peg holes. Color: brown. Much stronger than traditional laminated paper pegboard sold by most lumber and building centers. Improved resistance to moisture and staining.

**MCRF-Anodizing
Option Red**

DuraBoard: polypropylene plastic, wood by-product, 1/4" thick, 1/4" peg holes. Color: white. Superior-holding power over traditional hook board. Extremely durable, weather, moisture, grease, oil resistant will not stain. Most paint mist will not permanently adhere to.
